Analyst Insight: Revenue Velocity & Seasonality

Monthly dynamics show strong performance surges in **May (+10.59% MoM)** and **December (+15.83% MoM)**, driven by seasonal health demands. However, negative growth dips during June (-3.42%), August (-3.41%), and November (-3.79%) highlight distinct demand troughs that require targeted promotional campaigns.

2. COUNTRY & PRODUCT LEVEL BREAKDOWN

Geographic distribution reveals that **Germany (€0.78M)** and **France (€0.71M)** remain the primary market drivers, generating over 33% of total revenue. Conversely, Southern European markets like **Spain (€0.40M)** and **Austria (€0.36M)** show lower revenue density, presenting an opportunity for territory restructuring.

4. DATA ANALYST STRATEGIC RECOMMENDATIONS

Key Improvement Areas & Action Plan:

- **Revamp Promotional Campaign Design:** Promotional sales currently generate only 10.2% (€0.45M) of total revenue. Re-align promotional discounts specifically toward high-volume prescription products rather than general OTC items.
- **Turnaround Underperforming Outlets:** Outlets such as *Vienna HealthPoint #115* (€1.58K revenue, 16 orders) and *Warsaw #030* require operational audits or consolidation into nearby high-performing hubs.
- **Focus on High-Margin Categories:** Expand inventory for top profitability products like *AntiBioX ACE Inhibitor* (€24.99K profit) and *NeuroMed Antidepressant* which offer >21% net return.
- **Optimize Geographic Allocation:** Reallocate marketing expenditures from low-yield markets (Spain/Austria) toward scaling dominance in Germany and France.
